When to use Smart Camera

Application areas:

Measuring

Sorting & Counting

Identification

Pick & Place

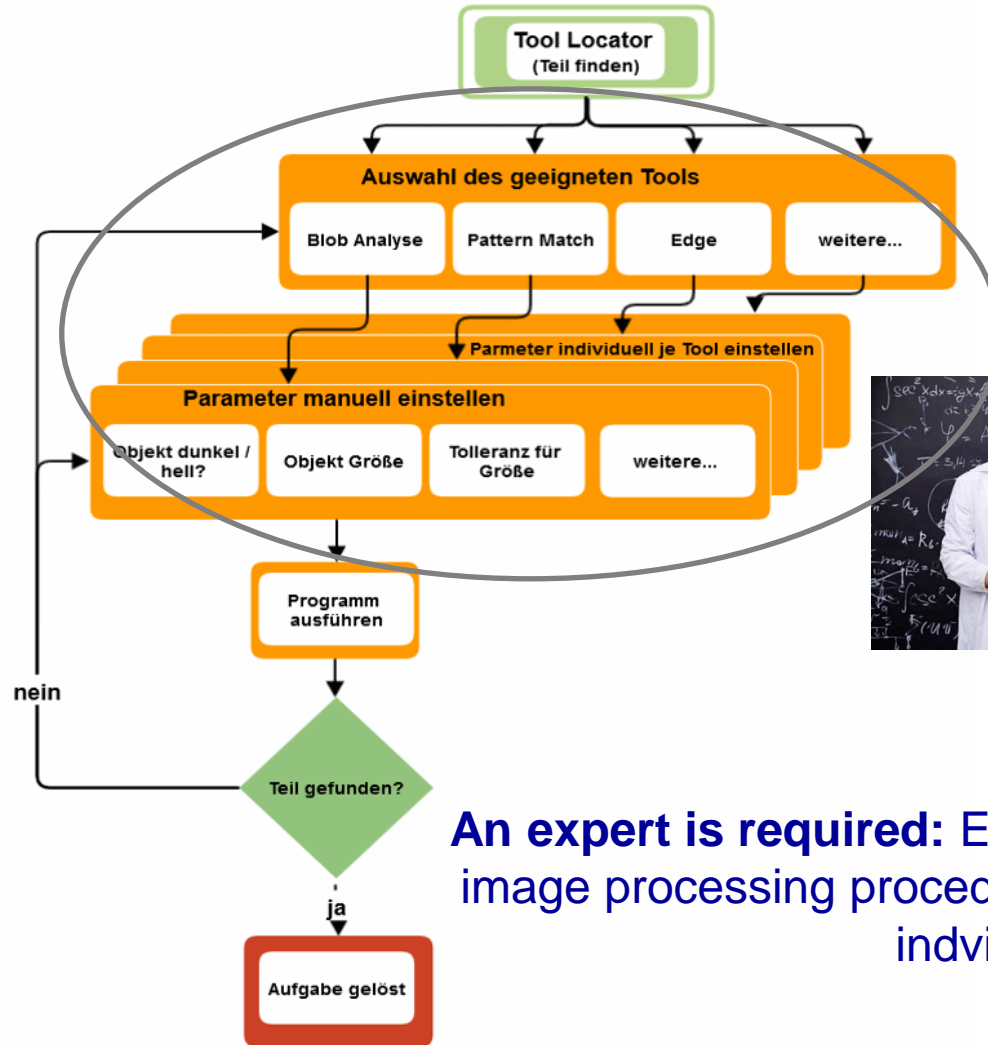

Quality assurance

When to use Smart Camera

SIMPLICITY

Standard cameras

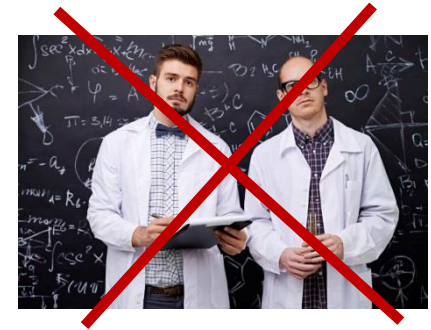

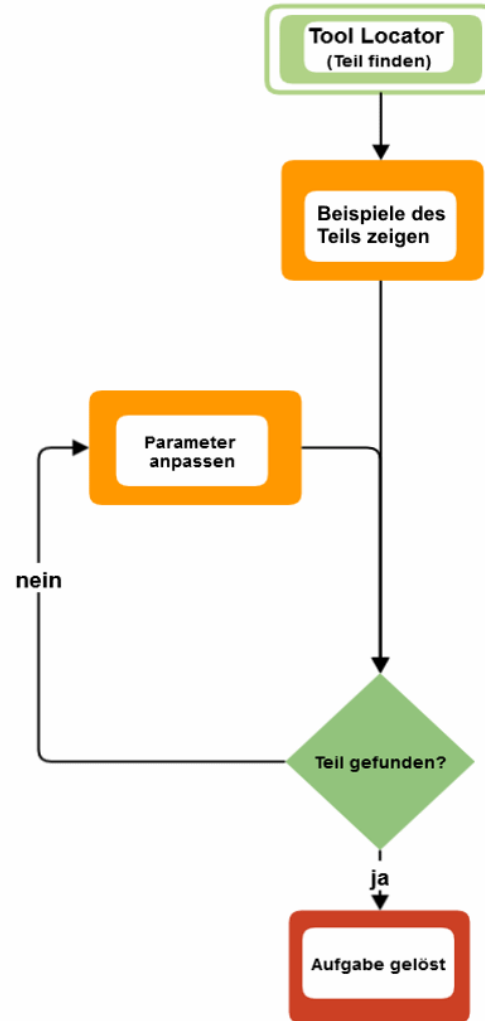

An expert is required: Expert selects the image processing procedure and sets the individual parameters

When to use Smart Camera

SIMPLICITY

*Smart
cameras*

No expert is required: System chooses the procedure itself and sets the parameters with the help of samples

When to use Smart Camera

Smart Cameras – Product philosophy

Intuitive & easy to configure Smart Camera

Intuitive:

- ▶ With a few steps to the complete inspection

Efficient:

- ▶ High performance

Multi-platform:

- ▶ Runs on camera, Windows/Linux PC (offline)
- ▶ Access via PC, tablet, smart phone

Extendable:

- ▶ Allows to include own tools

When to use Smart Camera

Features of Smart Cameras

- ▶ Easily find the camera in the network
